Important :

- Answer all questions
- In each of the questions 01 to 40, pick one of the alternatives (1), (2), (3), (4) which you consider as correct or most appropriate answer.
- Mark a cross (✕) on the number corresponding to your choice in the answer sheet provided.

(01) What is the animal phylum which consist a water vascular system?

- | | |
|-------------------|----------------|
| (1) Cnidaria | (2) Arthropoda |
| (3) Echinodermata | (4) Mollusca |

(02) The acid which is used for drying gases,

- | | | | |
|---------|------------------------------------|----------------------|--------------------------|
| (1) HCl | (2) H ₂ SO ₄ | (3) HNO ₃ | (4) CH ₃ COOH |
|---------|------------------------------------|----------------------|--------------------------|

(03) The SI unit of velocity is,

- | | | | |
|----------------------|--------|----------------------|----------------------|
| (1) ms ⁻¹ | (2) ms | (3) Nm ⁻² | (4) ms ⁻² |
|----------------------|--------|----------------------|----------------------|

(04) The enzyme which acts in acidic medium in human digestive system is,

- | | | | |
|-------------|------------|-------------|------------|
| (1) Amylase | (2) Pepsin | (3) Trypsin | (4) Lipase |
|-------------|------------|-------------|------------|

(05) Particles that are present in the nucleus of an atom,

- | | |
|--------------------------|----------------------------|
| (1) only protons | (2) only electrons |
| (3) protons and neutrons | (4) Neutrons and electrons |

(06) Weight of the object in air when the object is immersed in water , is Y. Weight of the displaced water is Z. What's the correct relationship between W,Y and Z ?

- | | | | |
|---------------|---------------|---------------|---------------|
| (1) Y - W = Z | (2) W - Y = Z | (3) Y + X = Z | (4) X = Y = Z |
|---------------|---------------|---------------|---------------|

(07) The genetical disorder which is caused due to the mutation of a chromosome which produces haemoglobin is,

- | | |
|-----------------|-----------------|
| (1) Haemophilia | (2) Thalassemia |
| (3) Anaemia | (4) Albinism |

(08) What is the correct lewis structure of Amonia?

(09) What is the correct order of following circuit symbols one?

- (1) Solar cell, earth, variable resistor, resistor.
 (2) Resistor, earth, variable resistor, solar cell.
 (3) Resistor, variable resistor, solar cell, earth.
 (4) Earth, resistor, variable resistor, solar cell.

(10) The substance which **is not** present in the glomerular filtrate of a healthy person is,

- (1) Proteins
 (2) Glucose
 (3) Amino Acids
 (4) Uric acid

(11) The chemical formula of the carbonate of X is XCO_3 . What is the chemical formula of the phosphate of X?

- (1) XPO_4 (2) X_2PO_4 (3) $\text{X}_2(\text{PO}_4)_3$ (4) $\text{X}_3(\text{PO}_4)_2$

(12) Which of the following **can not** occur due to the forces acting on an object,

- (1) To Change the mass
 (2) To Change the shape
 (3) To Change the velocity
 (4) To Change the direction

(13) What is the hormone which converts Glycogen into Glucose in the human body?

- (1) Insulin (2) Thyroxin (3) Glucogen (4) Calcitonin

(14) What is the atom/ion which consists noble gas configuration?

- (1) Ne /B (2) Ar/Be (3) He/H (4) $\text{Na}^+/\text{O}^{2-}$

(15) What happen when a wave passes through water?

- (1) Water particles move with water.
 (2) Water particles do not move.
 (3) The energy of the wave is not wasted.
 (4) The energy transmitted through the wave.

(16) Sperms are temporarily stored in ,

- (1) Seminiferous tubles (2) Epididymis
 (3) Vas deferens (4) Prostrate glands

(17) The factor that does **not** affect on the rate of reaction is,

- | | |
|------------------------------------|---------------------------------|
| (1) Surface area of the reactants. | (2) Temperature of the reaction |
| (3) Concentration of the reactants | (4) pH value |

(18) To which part the Service fuse and a switch should be connected in the house hold circuit,

- (1) To the Live wire
- (2) To the Live wire and Neutral wire.
- (3) To the Neutral wire and Live wire.
- (4) only to the Neutral wire.

(19) Most affected human body system as a result of corona virus is,

- | | |
|------------------------|------------------------|
| (1) Digestive system | (2) Respiratory system |
| (3) Circulatory system | (4) Nervous system |

(20) Out of the following reactions what is the an endothermic reaction?

- | | |
|--------------------------------|--------------------------|
| (1) Combustion of methane | (2) Cellular respiration |
| (3) Decomposition of limestone | (4) Acid - base reaction |

(21)

What is the correct statement regarding the bulbs A,B and C in the following circuit?

- (1) All the bulbs are connected in series.
- (2) B and C bulbs are connected paralel.
- (3) All the bulbs are connected in paralel
- (4) B and C bulbs are connected in series A bulb is connected in paralel

(22) Biological molecules which contain nitrogen are,

- | | |
|-------------------------------|--------------------------------|
| (1) Carbohydrate and lipids. | (2) Protein and lipids. |
| (3) Carbohydrate and proteins | (4) Protein and nucleic acids. |

(23) What is / are the product / s which form when magnesium reacts with steam?

- | | |
|---|--------------------------|
| (1) MgO | (2) Mg (OH) ₂ |
| (4) Mg (OH) ₂ , H ₂ | (4) MgO, H ₂ |

- (24) Following diagram shows how a wave propagated in 0.1 second. Find the velocity of that wave.

- (1) 0.2 ms^{-1} (2) 0.4 ms^{-1} (3) 0.8 ms^{-1} (4) 1 ms^{-1}
- (25) What is the **incorrect** statement regarding photosynthesis?
- (1) Takes place in the parenchyma tissue of plant leaf
 (2) Main product of photosynthesis is glucose
 (3) The source of releasing oxygen during the photosynthesis is water
 (4) photosynthesis rate is high in green colour light

- (26) Out of the following what is the balanced chemical reaction?

- (27) What is the amount of heat required to increase the temperature of 5 kg of water by 40°C
 (Specific heat capacity of water is $4200 \text{ J kg}^{-1} \text{ K}^{-1}$)
- (1) 47.6 KJ (2) 168 KJ (3) 200 KJ (4) 840 KJ

- (28) What is the correct statement about a cell organelle and its function?

Organelle	Function
(i) Mitochondria	Produce energy
(ii) Ribosome	Protein synthesis
(iii) Nucleus	Control cellular activities
(iv) Golgi complex	Produce secretory substances

- (29) What is the purpose of using CaCO_3 when extracting iron in a blast furnace?

- (1) To increase the temperature inside the blast furnace
 (2) To remove unnecessary substances in iron as slag.
 (3) Reduction of Haematite
 (4) To remove CO_2 Produced inside the blast furnace

(30) What is the amount of heat energy produced by a 3W heater within one minute?

- (1) 20 J (2) 180 J
(3) 3000J (4) 180 000J

(31) Characteristics of organism observed by children are listed below.?

- Segmented body
- Presence of exo skeleton
- Presence of the jointed appendages.

The phylum of the above organism is,

- (1) Annelida (2) Cnidaria (3) Arthropoda (4) Mollusca

(32) Out of the following which one **cannot** be considered as an assumption during the calculation of heat change when NaOH and HCl react?

- (1) Density of the mixture is equal to the density of water.
(2) Equal number of moles of acids and bases are reacting.
(3) Specific heat capacity of the mixture is equal to the specific heat capacity of water.
(4) The total heat produced is used to increase the temperature of the mixture.

(33) Following diagram shows how 3 forces are acting on a 4kg object. find the acceleration of the object.

- (1) 4ms^{-2} (2) 8ms^{-2} (3) 0.5ms^{-2} (4) 2ms^{-2}

(34) Out of the following statements which Statement is correct regarding the colour blindness carrier female married to a healthy male.

- (1) All female are carriers.
(2) All male children are healthy.
(3) Half of the female children are carriers.
(4) Half of the Female children are colour blind

(35) Out of the following answers which answer shows the change that takes place at the carbon electrodes when Aqueous NaCl solution is electrolysed?

- (1) Releasing H_2 near the (+) ve terminal
- (2) Production of NaOH in the solution
- (3) Reduction takes place at the anode.
- (4) Evolving of Cl_2 gas near the cathode.

(36) What is the equivalent resistance of $20\ \Omega$ and $30\ \Omega$ resistors connected parallelly?

- (1) $12\ \Omega$
- (2) $25\ \Omega$
- (3) $50\ \Omega$
- (4) $60\ \Omega$

(37) Following four apparatus are set to find the rate of reaction between Mg and HCl.

Which tube has the highest rate of reaction.

- (1) A
- (2) B
- (3) C
- (4) D

(38) Process that **does not** need bacteria in the nitrogen cycle is ,

- (1) Nitrification.
- (2) Fixation.
- (3) Atmospheric fixation.
- (4) Ammonification.

(39) At what point should the face be kept when shaving using a concave mirror?

- (1) Between F and P
- (2) Between C and F.
- (3) At C
- (4) At F

(40) What are the health impacts caused by the depletion of ozone layer to the human?,

- (1) Causes heart diseases .
- (2) Causes skin cancers
- (3) Causes respiratory problems
- (4) Causes kidney disorders.

බස්නාහිර පළාත් අධ්‍යාපන දෙපාර්තමේන්තුව மேல் மாகாணக் கல்வித் திணைக்களம் Department of Education - Western Province

ශ්‍රේණිය } 11 தரம் } 11 Grade } 11	විෂය } பாடம் } Science Subject }	පත්‍ර } வினாத்தாள் } II Paper }	කාලය } 03 h காலம் } 03 h Time }
Name :-		Index No :-	

Important :

- ♦ Answer **all** question of part "A" in the given space, Answer **three** questions of part "B" Submit answer.

Part A - Structured Essey

- (01) The following graph has been drawn to show the concentration of carbondioxide (CO₂) Nitrogen (N₂) and sulphur dioxide (SO₂) variation in the atmosphere in a main city of a developing country from January to August in 2020.

- (i) What is the environmental crisis that has been occurred due to the increasing (CO₂) concentration?
 (1 M)
- (ii) How much sulphur dioxide concentration was present in the atmosphere in February?
 (1M)
- (iii) (a) Which gas has caused photo chemical smog?
 (1 M)
- (b) According to the graph which month is more open to photo chemical smog?
 (1 M)
- (iv) Covid - 19 had spread rapidly from March to May. During that period concentration of gases have decreased. Give one reason for it
 (1M)

(B) Following table shows the day today activities of X and Y persons.

Activity	Method of X	Method of Y
* Transport	Foot cycle	Car
* Vegetable consumption	From his own garden	Buy from the market
* Fruit consumption	From his own garden	Buy from the market
* Using electrical appliances	Very low	Very high

(i) Who has a high carbon footprint? (1M)

.....

(ii) Who has a short footmile. (1M)

.....

(iii) Give one advantage of short footmile. (1M)

.....

(iv) Write one sustainable agricultural use in gardening. (1M)

.....

(v) Following food chain is found in X's garden.

Grass → Grasshopper → Toad → Snake

If 1000J energy is stored in grass how much energy will reach to the snake? (1M)

.....

(C) Following flow chart shows the organizational levels of the biosphere.

(i) Define 'population'

.....

..... (1M)

(ii) Name S and T organization levels

S.....

T..... (1M)

(iii) Efficiency of the nitrogen cycle is less in an agricultural eco- system than in a forest.

a) Which type of nitrogen ion/s is absorbed by plants from the soil?

..... (1M)

b) Write a human activity that decreases the efficiency of the nitrogen cycle in an agricultural eco- system.

..... (1M)

(Total 15 M)

- (2) (A) The following flow chart shows lipids digest and its end products are absorbed in human digestive system.

- (i) What is denoted as X fluid?
..... (1M)
 - (ii) Which gland secretes Lipase enzyme?
..... (1M)
 - (iii) What is the end product denoted as Y?
..... (1M)
 - (iv) Which part of Villi absorb the end products of Lipids?
..... (1M)
 - (v) Inner lining and mucosa of the stomach can be inflamed due to different reasons.
 - (a) Name the above disease.
..... (1M)
 - (b) Write a good food habit to avoid the above disease.
..... (1M)
- (B) Following diagram shows how pollination occurs in a certain species of a flower.

- (i) Name the pollination types denoted by X and Y.
 X -
 Y - (2M)
- (ii) Which pollination type above creates variations?
..... (1M)
- (iii) Gametes form in 'a' structure. Which type of cell division occurs in 'a'?
..... (1M)

- (C) **A child moves his hand immediately away when it contacts with a hot surface.** The impulse passes from the receptor to the effector as shown in the flow chart.

(ii) Name a chemical compound that can be used as X?
 (1M)

(iii) Write a strategy that we should take when preparing these solutions to get the above results.
 (1M)

(C) Urea [$\text{CO}(\text{NH}_2)_2$] is used in agriculture for Nitrogen deficiency in crops.
 (C=12, O=16, N=14, H=1)

(i) Find the molar mass of urea.

 (2M)

(ii) How many moles present in 30g of urea?

 (2M)

(iii) Does the temperature increase or decrease when urea dissolves in water?
 (1M)
 (Total 15M)

(4) (A) The following diagram shows a water ghost ("Diya Holmana") prepared by a student. When water is added to B vessel slowly the bamboo stick came to the balance position. The bamboo stick is light in weight and straight

(i) Find the mass of water in vessel B. after disregarding the weight of the vessel and the friction at the turning point.

 (2M)

(ii) When we added more water to vessel B, the corner of the bamboo stick touched the hard rock and made a big noise. What type of mechanical wave is it?
 (1M)

(B) The following circuit diagram was made by a student to convert alternative current to a direct current.

(i) What is 'X'? (1M)

(ii) Write the function of X. 1M)

(iii) Draw the shape of the following graph when electric current which passes through in the graph below.

(C) The following diagram shows an instance where an object floats on water

(i) Name the forces P and Q.
P -
Q - (2M)

(ii) Calculate the magnitude of force P.
..... (2M)

(iii) What can you tell about the magnitude of P and Q forces?
..... (1M)

(D) The following diagram shows how forces are acting on a moving vehicle.

(i) What is the unbalanced force acting on the vehicle towards the moving direction?
..... (1M)

(ii) Find the acceleration of the vehicle if the mass of the vehicle is 1000 kg.
..... (1M)

(iii) Write a characteristic in vehicle tyres that can be seen to increase the friction.
..... (1M)
(Total 15)

Part B - Essay

☒ **Answer three questions only.**

(05) (A) Following figure shows three organisms. Answer the question using the given organisms.

K

L

M

- (i) Identify the organism K. (1M)
- (ii) L organism is sensitive to antibiotics. Name the domain that organism L belongs to. (1M)
- (iii) Write a special feature of the above domain. (1M)
- (iv) M organism belongs to kingdom fungi
 - (a) Name the compound that the fungi cell wall is made out of. (1M)
 - (b) Write an economical advantage of kingdom fungi to man. (1M)

(B) Human respiration is a complex process which contains two processes known such as expiration and inspiration

- (i) Write a change that happens to inhaled air when it is passing through the nasal cavity.
- (ii) What happens to the following structures in the chest cavity during the process of inhaling?

Structure	Change happens during the inhalation
(a) Sternum	
(b) Diaphragm	

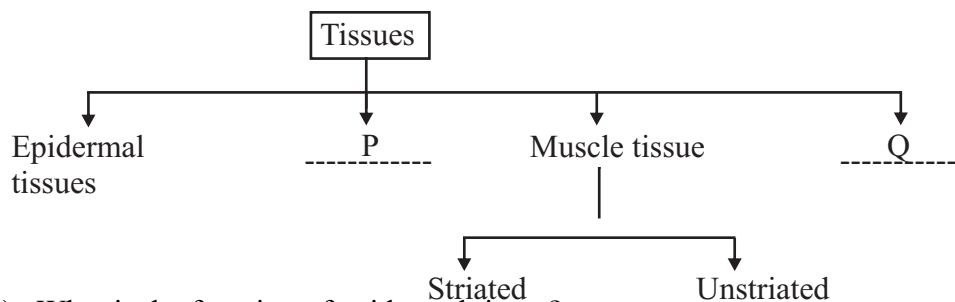

(1x2= 2M)

(iii) Following diagram shows how air exchange occurs in the alveoli sacs in the lungs

- (a) Name the gas. X (1M)
- (b) Which blood cell transport O_2 gas and name the pigment present in that blood cell? (2M)
- (iv) 200m distance runner abandoned the event due to a muscle pain in his leg. Briefly explain the reason for it. (2M)

(C) Following diagram shows the summary of human tissues.

- (i) What is the function of epidermal tissue? (1M)
- (ii) Name is P and Q tissues (2M)
- (iii) What is the involuntary striated muscle cell? (1M)
- (iv) Name is the following paint tissues

- (v) To prepare the microscopic slide of Y which part of the plant can we use? (1M)

- (6) (A) The graph illustrate first ionization energy of few elements of atomic number 3-11 in the periodic table. Answer the following questions using the given graph

- (i) Define first ionisation energy. (1M)
- (ii) Write the electronic configuration of element H (1M)
- (iii) Write the
 - (a) period
 - (b) group of element E (2M)
- (iv) Which element has the highest electro-negativity? (1M)
- (v) What is the allotrope of D which can conduct electricity? (1M)
- (vi) How can element I be stored? (1M)

(B) Naturally Oxygen element stays as homo-atomic molecules. Following setup is used to produce Oxygen gas.

- (i) What is the chemical X? (1M)
- (ii) Write the type of chemical reaction which occurs when heating chemical X (1M)
- (iii) What is the method used to collect Oxygen gas in the above set-up. (1M)
- (iv) Write two uses of the oxygen gas. (2M)
- (v) Find the number of molecules present in 48g of oxygen (O=16) (2M)

(C) Three labels were missing in solutions in the science laboratory. They were named as A, B and C. One of these solutions are HCl and other one is NaOH.

- When phenolphthaleine added - solution A converts to pink and other two remains colourless.
- When PH paper is added to C, it gives the colour relevant for PH 7

- (i) What is the acidic solution among A, B and C? (1M)
- (ii) What's the colour change that we can observe by adding PH paers to HCl acid? (1M)
- (iii) What are the two type of ions present in the aqueous solution of HCl? (2M)
- (iv) Find the PH value of salt that is produced when equal volumes and concentration of HCl and NaUH reacts. (1M)
- (v) What is the name given to the above (vi) type of reactions? (1M)

- (07) (A) Following diagram shows two newton spring balances when force is exerted on a ring

- If the ring does not move find the resultant force acting on the ring. (1M)
- write two characteristics of the forces when they are in equilibrium (2M)

- (B) The diagram shows the consumer unit and the electric meter in a modern domestic circuit

- Find the voltage between L and N wires. (1M)
- Name A and B. (2M)
- Write the function of C. (1M)
- The power 40w electric appliance is connected to a domestic circuit. It is operated 30min per day for 30 days. How much units were used for 30 days. (2M)

- (C) The following diagram illustrates an activity done by a student for electro magnetic induction

A and B LED bulbs are connected by changing terminals their.

- (i) What is the observation when a powerful magnet is inserted into a coil and removed from the coil? (1M)
- (ii) According to the above observation which type of electric current is induced in the copper coil? (1M)
- (iii) Write a method to increase the above electric current induced using a copper coil. (1M)

(D) The following diagram illustrates an automatic fire alarm circuit. When a fire occurs, the bimetallic strip expands and the circuit completes.

- (i) Which metal out of X and Y expands more to complete the circuit? (1M)
- (ii) What is the method used to transfer heat in the bimetallic strip? (1M)
- (iii) When the bimetallic strip cools, heat energy is lost. How is heat lost? (1M)
- (iv) Name an electronic appliance which uses bimetallic strips. (1M)
- (v) What is the advantage of using steam compared to hot water when cooking food? (1M)

(E) The following illustration shows a biconvex lens used to observe an image of the candle

- (i) Draw a correct ray diagram (2M)
- (ii) Name an instrument which uses the above situation (1M)

- (08) (A) A group of students went to identify organic compounds in a food sample. They have mixed the food with water and 2ml of the sample were taken and put them in three test tubes as follows

- Name organic compounds in the food. (1M)
- What is the solution labelled as P? (1M)
- Name the vitamin defect which creates bito spots in the eye. (1M)
- Special features of water is important to carry the life processes of living organisms.
 - "Water has cohesive and adhesive forces" What is the meaning of this? (1M)
 - How does the solvent nature of water affect the existence of fish in water? (1M)

- (B) The way of homeostasis of water in human body is illustrated in the following diagram.

- Name the hormone denoted by letter 'L'. (1M)
- What is the chemical compound present in kidney stones? (1M)
- Write two reasons which cause kidney stones. (2M)

(C) The running event starts by a signal given using a pistol. This incident is observed by a student from far.

(i) Mention the reason for the time difference to see the smoke and hear the sound. (2M)

(ii) It takes 0.4s to hear the sound after seeing the smoke. Calculate the distance between the student and the person who gives the signal. (In air sound travels 330ms^{-1}) (2M)

(D) A and B two inclined planes are placed as follows. Then a glass ball is released from 'h' height from A inclined plane. Path of the ball given in the diagram.

(i) In which part of the inclined plane does the velocity of the glass ball increase? (1M)

(ii) In which part of the inclined plane is kinetic energy high in the ball? (1M)

(iii) Potential energy of the ball at P is 100J. Mass of the ball is 500g. Find the velocity of ball at Q. (2M)

(v) If inclined plane is roughed what happens to the velocity of the ball in III? Give reasons. (2M)

(9) (A) Following setup was arranged to find the factors necessary for rusting.

(i) Which factor needed for rusting is checked by the above experiment? (1M)

(ii) What is the function of CaCl_2 present in tube B? (1M)

(iii) Write the observation after few days in the X parts of nails present in.

(a) A tube -

(b) B tube -

(2M)

(iv) Grease contains carbon and Hydrogen. Name the chemical group that grease belong to.

(1M)

(B) Chemical formula of ethene is C_2H_4 Polythene is made by polymerization of ether.

(i) Draw a repeating unit of polythene.

(1M)

(ii) Write two special characteristics of polythene.

(2M)

(iii) Write a name of the natural polymer.

(1M)

(iv) Write an environmental problem caused due to high usage of polythene.

(2M)

(C) Following velocity - time graph is relevant to a straight line motion of a motor vehicle.

(i) What is the time duration in which the vehicle travels in a uniform velocity. (1M)

(ii) Mass of the vehicle is 500kg. Find the momentum of it at uniform velocity. (2M)

(iii) In 150th second driver saw a tortoise crossing the road within a 30m distance.

He applied break and stopped the vehicle within 25S. Did the vehicle hit the tortoise? Demonstrate by calculating.

(2M)

(D) Following circuit diagram is set by a student to check the factors that affect resistance. The A and B gap in the circuit is connected connect using an equal length (5cm) and equal diameter copper and Nichrome wires separately and the brightness of the bulb is observed.

(i) What is the function of A?

(1M)

(ii) Brightness of the bulb increase in the circuit in which occasion

(a) Copper wire connects A and B

(b) Nichrome wire connects A and B

(1M)

(iii) What is the reason for above (ii) observation?

(1M)

(iv) Resistance of the copper wire is 10Ω and resistance of the bulb is 5Ω . Find the electric current passing through the circuit.

(2M)

බස්නාහිර පළාත් අධ්‍යාපන දෙපාර්තමේන්තුව மேல் மாகாணக் கல்வித் திணைக்களம் Department of Education - Western Province

ශ්‍රේණිය } 11 தரம் } Grade	විෂය } பாடம் } Science Subject	පත්‍රය } வினாத்தாள் } I, II Paper

I - Paper - Answer

(1) 3	(11) 4	(21) 3	(31) 3
(2) 2	(12) 1	(22) 4	(32) 2
(3) 1	(13) 3	(23) 4	(33) 4
(4) 2	(14) 4	(24) 3	(34) 3
(5) 3	(15) 4	(25) 4	(35) 2
(6) 2	(16) 2	(26) 3	(36) 1
(7) 2	(17) 4	(27) 4	(37) 3
(8) 4	(18) 1	(28) 1	(38) 3
(9) 2	(19) 2	(29) 2	(39) 1
(10) 1	(20) 3	(30) 4	(40) 2

II Paper - Answer Part - A

- (01) (A) (i) Global warming (Mark 01)
 (ii) 50 ppm (Mark 01)
 (iii) (a) NO / NO_2 (Mark 01)
 (b) August (Mark 01)
 (iv) reduce burning of fossil fuel / closure of industries/ less traffic (Mark 01)
- (B) (i) y (Mark 01)
 (ii) x (Mark 01)
 (iii) minimum cost / more sustainable (Mark 01)
 (iv) use of organic fertilizer/bio control methods/use of natural pesticides (Mark 01)
 (v) 1J (Mark 01)
- (C) (i) A group of organisms belong to the same species in a particular geographical location during a specific time period is called a population (Mark 01)
 (ii) S - community
 T - Eco system (Mark 1×2=2)
 (iii) (a) $\text{NO}_3 / \text{NO}_2$ (Mark 01)
 (b) destroy soil organisms due to usage of agro chemicals/chemical fertilizers/removing harvest etc. (Mark 01)
 (Total Mark 15)

- (02) (A) (i) bile (Mark 01)
 (ii) Pancreas (Mark 01)
 (iii) glycerol (Mark 01)
 (iv) lacteals (Mark 01)
 (v) (a) gastritis (Mark 01)
 (b) Having food in time / less consumption of oily & spicy food (Mark 01)

- (B) (i) X - self pollination Y - cross pollination (Mark 02)
 (ii) Y (Mark 01)
 (iii) meiosis (Mark 01)

- (C) (i) reflex arch (Mark 01)
 (ii) P - inter neurone
 Q - motor neurone (Mark 02)
 (iii) increase the speed of transmission of impulses (Mark 01)
 (iv) skeletal muscle tissue (Mark 01)

(Total Mark 15)

- (03) (A) (i) 1. to measure the amount of given liquid correctly
 2. to measure the mass (Mark 02)

- (ii) relative molecular mass of sucrose is 342
 mass of sucrose in 100cm³ of 1 moldm⁻³

$$= \frac{1}{1000} \times 106 \text{ mol}$$

$$= 0.1 \text{ mol}$$
 (Mark 02)

$$\text{mass of sucrose} = 340 \text{ g mol}^{-1} \times 0.1 \text{ mol}$$

$$= 34.2 \text{ g}$$
 (Mark 01)

- (iii) by heating sucrose solution (Mark 01)

- (iv) (a) sugar cane stems
 (b) crystalization (Mark 02)

- (B) (i) ionic bonds (Mark 01)
 (ii) NaCl (Mark 01)
 (iii) by washing the vessel with distilled water completely (Mark 01)

- (C) (i) molar mass of urea = (12 + 16) + (14 × 2 = 2 × 2)
 = 28 + 28 + 4
 = 60 gmol⁻¹ (Mark 02)

- (ii) No. of moles in urea = 30g

$$\frac{60 \text{ gmol}^{-1}}{= 0.5 \text{ mol}}$$
 (Mark 02)

- (iii) decreases (Mark 01)

(Total Mark 15)

(04) (A) (i) $w \times \frac{75}{100} \text{ m} = 15 \text{ N} \times \frac{50}{100} \text{ m}$
 $w = \frac{750}{75} \text{ N}$
 $w = 10 \text{ N}$

$$m = 1 \text{ kg}$$
 (Mark 02)

- (ii) longitudinal waves / sound waves (Mark 01)

(B) (i) Rectify diode

(Mark 01)

(ii) half wave rectification

(Mark 01)

(iii) current

(Mark 02)

(C) (i) P - upthrust

P - weight of the object

(Mark 02)

(ii) $P = 7.5 \text{ N} - 5 \text{ N}$

$+ 2.5 \text{ N}$

(Mark 02)

(iii) P and Q have equal forces

(Mark 01)

(D) (i) $F = 20000 \text{ N} - 15000$

$= 5000 \text{ N}$

(Mark 01)

(ii) $F = ma$

$5000 \text{ N} = 1000 \text{ kg} \times a$

$a = 5 \text{ ms}^{-2}$

(Mark 01)

(iii) having grooves

(Mark 01)

(Total Mark 15)

(05) (A) (i) paramecium

(Mark 01)

(ii) kingdom bacteria

(Mark 01)

(iii) prokaryotic / no organized nucleus

(Mark 01)

(iv) (a) chitin

(Mark 01)

(b) to manufacture antibiotics / to produce bread & alcohol

(Mark 01)

(B) (i) to remove dust particles from inhaled air

to moisturize inhaled air.

to warm up inhaled air to get the body temperature

(Mark 01)

(ii) (a) moves forward

(b) reduce the curvature

(Mark 02)

(iii) (a) CO_2

(Mark 01)

(b) red blood cells, hemoglobin

(Mark 02)

(iv) lactic acid collected in muscles

during anaerobic respiration

(Mark 02)

(C) (i) lining up of free surfaces & protection / absorptive function / perception of stimuli / secretory function

(Mark 01)

(ii) P - nervous tissue

Q - connective tissue

(Mark 02)

(iii) cardiac muscle cells

(Mark 01)

(iv) X - parenchyma tissue

Y - collenchyma tissue

(Mark 02)

(v) cross section of young pumpkin stem. / "monara kudumbiaya"

(Mark 01)

(Total Mark 20)

- (06) (A) (i) The formation of a unipositive gaseous ion by removing an electron from an atom in the gaseous state (Mark 02)
- (ii) 2, 8 (Mark 01)
- (iii) a) 2nd period
b) V group (Mark 02)
- (iv) G (Mark 01)
- (v) graphite (Mark 01)
- (vi) in paraffin wax (Mark 01)
- (B) (i) KMnO_4 / potassium permanganate (Mark 01)
- (ii) decomposition reaction (Mark 01)
- (iii) downward displacement of water (Mark 01)
- (iv) for respiration / to produce oxy - acetelene flame / for the divers & astronauts / as a combustible gas (Mark 02)
- (v) no of molecules in 32g of O_2 = 6.022×10^{23}
no of molecules in 64g of O_2 = $\frac{6.022 \times 10^{23} \times 48}{32} = 1.5 \times 6.022 \times 10^{23}$ (Mark 02)
- (C) (i) B (Mark 01)
- (ii) red (Mark 01)
- (iii) H^+ Cl^- , OH^- (Mark 01)
- (iv) $\text{PH} = 7$ (Mark 01)
- (v) neutralization reaction (Mark 01)
- (Total Mark 20)
- (07) (A) (i) zero
- (ii) linear
act in opposite direction (Mark 02)
- (B) (i) 230V (Mark 01)
- (ii) A - overload circuit breaker (service fuse)
B - electric meter (Mark 02)
- (iii) for distribution of current through light and socket circuit. (Mark 01)
- (iv) no of units = $40 \times \frac{30}{60} \times 30 \text{ wh}$
= $\frac{600}{1000} \text{ kwh}$
no of units = 0.6 kwh (Mark 02)
- (C) (i) A & B LED bulbs are lighted one after the other (Mark 01)
- (ii) alternative current (Mark 01)
- (iii) use of strong magnet / increase number of turns in copper wire (Mark 01)

- (D) (i) X (Mark 01)
 (ii) conduction (Mark 01)
 (iii) radiation (Mark 01)
 (iv) electric iron (Mark 01)
 (v) heat energy increases as a result of latent heat (Mark 01)

- (ii) simple microscope (Mark 01)

(Total Mark 20)

- (08) (A) (i) Lipid, Protein (Mark 01)
 (ii) CuSO_4 (Mark 01)
 (iii) vitamin A (Mark 01)
 (iv) (a) inter molecular attractive forces (Mark 01)
 (b) • Oxygen is dissolved in water
 • Aquatic organisms like fish gets oxygen from dissolved oxygen in water

(Mark 01)

- (B) (i) ADH (Mark 01)
 (ii) calcium oxalate (Mark 01)
 (iii) • not drinking enough water
 • postponing of urination (Mark 02)

- (C) (i) velocity of sound is different from velocity of light in air
 (ii) $\text{velocity} = \frac{\text{distance}}{\text{time}}$
 $= 330\text{ms}^{-1} \times 4\text{s}$
 $= 1320\text{m//}$

- (D) (i) In part AQ (Mark 01)

- (ii) At Q (Mark 01)

(iii) (Ep) $mgh = \frac{1}{2} mv^2$ (Ek)
 $100\text{ J} = \frac{1}{2} \times \frac{500}{1000} \times V^2$

$$V^2 = 400$$

$$V = 20\text{ms}^{-1}\text{//}$$

(Mark 02)

- (iv) • decrease the speed
 • frictional force acts opposite to the direction of motion (Mark 02)

(Total Mark 20)

- (09) (A) (i) water (Mark 01)
 (ii) to absorb water vapours in tube B (Mark 01)
 (iii) a) corroded
 b) not corroded (Mark 02)
 (iv) hydrocarbon (Mark 01)

- (ii) electric insulators / water proof / air proof / light / can stand with tensions (Mark 01)
 (iii) cellulose/DNA/Protein/Rubber/Starch (Mark 01)
 (iv) environment pollution as they do not decay or relevant answer (Mark 02)
 (Mark 01)

- (C) (i) during (0 - 150) s (Mark 01)
 (ii) momentum = $500\text{kg} \times 25\text{ms}^{-1}$ $\frac{25 \times 2}{2}$
 = 12500 kgms^{-1} (Mark 02)
 (iii) distance traveled in deceleration =

$$= 25\text{m}$$

The vehicle traveled 25m within 2 seconds. But the tortoise is 30m away. so no accidents takes place (Mark 02)

- (D) (i) by measuring current in the circuit (Mark 01)
 (ii) copper (Mark 01)
 (iii) resistivity is less in copper than nichrome (Mark 01)
 (iv) $V = IR$
 $3 = 1 \times 5$
 $\frac{3}{15} = I$
 $\frac{1}{5} = 0.2^A = I$ (Mark 02)

(Total Mark 20)
